

**iCCnet CHSA- Hospital Buying Group
May 16 Reporting**

We wish to advise you of the addition of a Hospital Buying Group; **iCCnet CHSA** effective May reporting 2016.

Previously, sales to distribution centers may not have been captured in IMS Health reporting due to this type of outlet not being a reportable outlet within the IMS deliverables. Creating a buying group and assigning the relevant sales to a newly created outlet now allows missing data to be reported. Whilst we are unable to provide visibility of the distribution of sales to an individual outlet the group is associated with, this does allow sales into the buying group to be captured in IMS Health reporting.

In this instance, sales are specific to a highly specialized cardiovascular product and were previously captured in Other Outlet reporting. Further investigation into the customer type has resulted in the creation of this Hospital buying group; removing sales from Other Outlet channel reporting and instead reporting sales within this newly created iCCnet CHSA Hospital Buying Group effective May 2016 and inclusive of history sales July 2015 onwards.

Hospital Details:

1. Outlet: 5042280
iCCnet CHSA
Level 2B Mark Oliphant Bldg Science Park Laffer Drive,
BEDFORD PARK SA 5042

Type: Hospital Buying Group
Brick: 5042C
Retail SBrick: 50420

Please note this buying group will be included in your May reporting and depending on your deliverable requires cross referencing during June 16 maintenance

Required Maintenance for Profits and PROBE Data

i. Analysis Manager

This Hospital will be reported as unassigned in your TxR and associated Analysis Manager cubes for May 2016.

If you wish, please assign this buying group and submit with your June Maintenance commencing Thursday 16th June

If you use the Standard IMS Territory Structures, the new hospital bricks will be assigned to our standard hospital (109) and combined (309) structures for May 2016 reporting period, which requires no additional maintenance.

ii. FlatFiles

PROFITS and PROBE data that do not use a territory structure e.g. flatfiles, will include the sales for the new hospitals against the brick/outlet as per usual processes.

iii. MiPortal

This hospital has automatically been assigned to the Retail SBrick 50420 on your behalf effective May reporting
